**WEAR THE CHANGE:  
CHOOSE ECO FABRIC**

# FROM BAMBOO!

Bamboo fiber fabric is a natural textile that is made from the pulp of bamboo grass and is known for its softness, breathability, and moisture-wicking properties. It is also hypoallergenic, UV protection and naturally antimicrobial, making it a popular choice for clothing. Additionally, bamboo fiber is eco-friendly, as bamboo is a renewable and fast-growing resource that requires fewer resources to grow compared to other crops.
